INTRODUCTION

- The **E-Learning Platform** is a web-based application designed to provide online education to users.It allows students to access courses, watch video lectures, and improve their skills.
- The platform offers a simple and user-friendly interface for learning anytime and anywhere.It helps users gain knowledge efficiently through digital content and interactive features.
- The system enhances learning experience by providing structured course materials and easy navigation.

KONGU ENGINEERING COLLEGE

OBJECTIVE

- To develop a web-based platform for online learning
- To develop a web-based platform for online learning
- To enable users to learn anytime and anywhere
- To improve knowledge through video-based learning
- To create an interactive and user-friendly learning environment

KONGU ENGINEERING COLLEGE

SOFTWARES USED

Frontend:

- React.js
- React Router
- CSS
- Axios / Fetch

Backend:

- Node.js
- Express.js

Database:

- MongoDB

Authentication:

- Vite
- VS code

KONGU ENGINEERING COLLEGE

MODULES USED

- **Authentication Module**

  Handles user registration and login with secure access

- **Course Module**

  Displays available courses and learning materials

- **Video Learning Module**

  Allows users to watch video lectures and tutorials

- **Progress Tracking Module**

  Tracks user learning progress and course completion

- **Admin Module**

  Manages course uploads and content updates

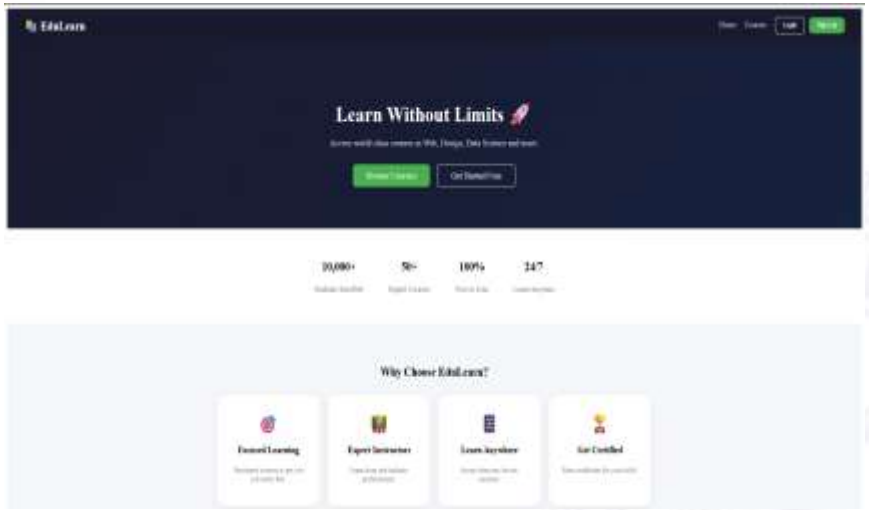
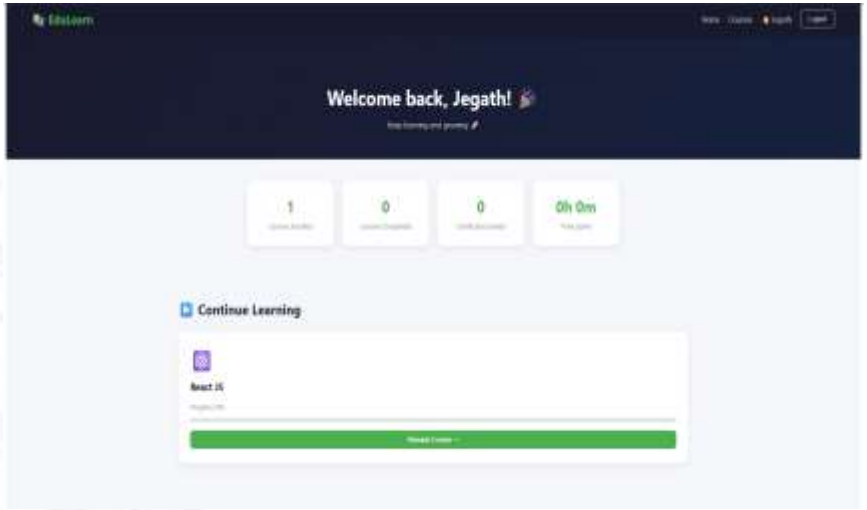
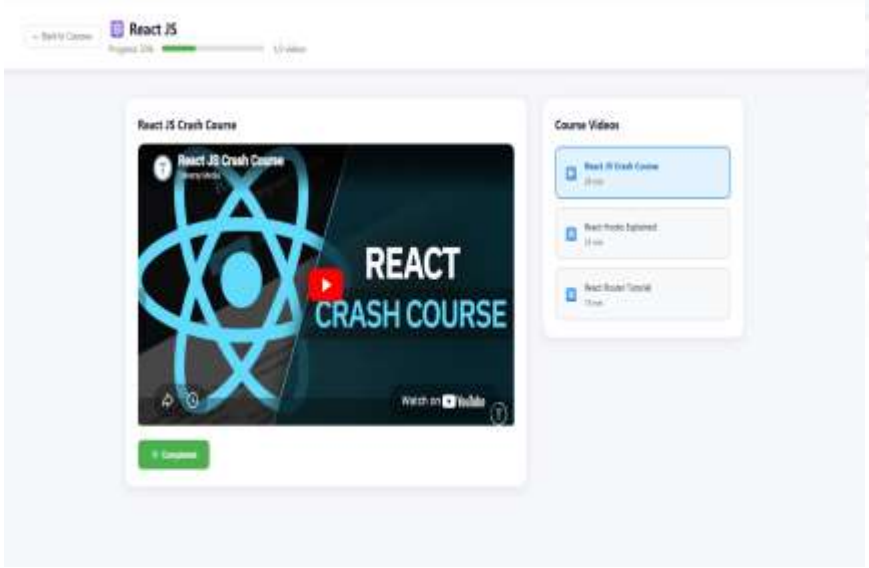
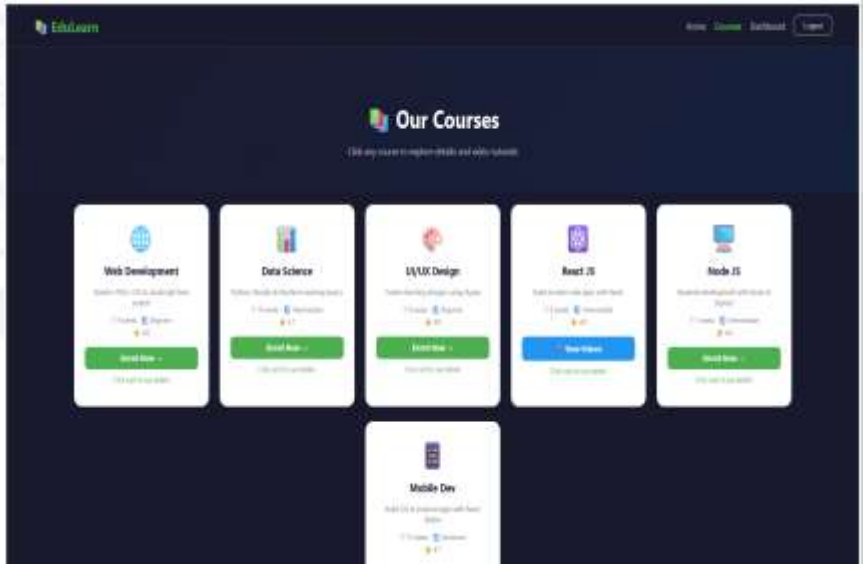
PROJECT SCREENSHOTS









KONGU ENGINEERING COLLEGE

CONCLUSION

- The **E-Learning Platform** provides an efficient and flexible way for users to learn online.

  It allows users to access educational content, watch videos, and improve their knowledge.

- The application ensures a smooth user experience with a simple interface and easy navigation.

  By using modern technologies like React.js, Express.js, and MongoDB, the system delivers good performance and secure data handling.

- Overall, the project demonstrates an effective solution for digital learning in today's technology-driven world.
